VERTICA

The International Journal of Rotorcraft and Powered Lift Aircraft

Editor-in-Chief
P. Friedmann (University of California, U.S.A.)

Author Index and Volume Contents

VOLUME 13, 1989

PERGAMON PRESS

Oxford · New York · Beijing · Frankfurt · São Paulo · Sydney · Tokyo · Toronto

VERTICA

The International Journal of Rotorcraft and Powered Lift Aircraft

EDITOR-IN-CHIEF

Professor P. Friedmann

Mechanical, Aerospace and Nuclear Engineering Department, University of California, 5732H Boelter Hall, Los Angeles, CA 90024, U.S.A.

ASSOCIATE EDITORS

Dr W. Johnson
Johnson Aeronautics
Palo Alto
CA 94301, U.S.A.

Professor D. H. Hodges
School of Aerospace Engineering
Georgia Institute of Technology
Atlanta, GA 30332, U.S.A.

Dr F. Straub
Aeromechanics R & D
McDonnell Douglas Helicopters
Mesa, AZ 85205, U.S.A.

EDITORIAL ADVISORY BOARD

Professor I. C. Cheeseman
University of Southampton, U.K.

Professor A. Azuma
University of Tokyo, Japan

Professor I. Chopra
University of Maryland, U.S.A.

R. Dat
ONERA, Châtillon, France

Professor G. T. S. Done
The City University, London, U.K.

Professor N. D. Ham
Massachusetts Institute of Technology
U.S.A.

Mr Anton J. Landgrebe
United Technologies Research Center, U.S.A.

Dr M. V. Lowson
Westland Helicopters Ltd, U.K.

Professor R. G. Loewy
Rensselaer Polytechnic Institute, U.S.A.

Dott. Ing. B. Lovera
Construzioni Aeronautiche
Giovanni Agusta S.p.A., Italy

Dr Robert A. Ormiston
U.S. Army Research & Technology Labs
U.S.A.

Professor D. A. Peters
Georgia Institute of Technology, U.S.A.

M. G. Petit
Société Nationale Industrielle Aérospatiale
France

G. Reichert
Technical University Braunschweig
West Germany

Dr R. E. Singleton
U.S. Army Research Office, U.S.A.

Professor H. Wittenberg
Technische Hogeschool Delft
The Netherlands

Subscription Rates (1990)

Annual institutional subscription rate (1990) DM 505.00; 2-year institutional rate (1990/91) DM 959.50; personal subscription rate for those whose library subscribes at the regular rate (1990) DM 169.00.

Subscription enquiries from customers in North America should be sent to: *Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.* For the remainder of the World to: *Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England* (*Tel.* Oxford (0865) 64881). Prices are subject to amendment without notice.

Back Issues

Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon Press offices.

Publishing Office

Pergamon Press plc, Journals Production Unit, Hennock Road, Marsh Barton, Exeter, Devon EX2 8NE, England (*Tel.* Exeter (0392) 51558; *Telex* 42749).

♾™The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

Volume Contents

Number 1

R. H. Miller, S. C. Ellis and L. Dadone	1	The effects of wake migration during roll-up on blade air loads
D. Banerjee and P. Shanthakumaran	17	Application of numerical optimization methods in helicopter industry
M. J. Riley	43	Measurements of the performance of a helicopter swept tip rotor in flight
C. W. Acree Jr and Mark B. Tischler	51	Identification of XV-15 aeroelastic modes using frequency-domain methods
Ana F. Tinetti and Kenneth D. Korkan	63	Generic icing effects on forward flight performance of a model helicopter rotor
	i	Guidelines for the preparation of typescripts for direct reproduction

Number 2

Michael S. Torok and Inderjit Chopra	87	A coupled rotor aeroelastic analysis utilizing non-linear aerodynamics and refined wake modeling
Bernadette Peleau and Didier Petot	107	Aeroelastic prediction of rotor loads in forward flight
A. Yue, I. Postlethwaite and G. Padfield	119	H^{∞} design and the improvement of helicopter handling qualities
J. Steinhoff and K. Ramachandran	133	A vortex embedding method for free wake analysis of helicopter rotor blades in hover
Gopal H. Gaonkar, C. S. Nagaraj and J. Nagabhushanam	143	Prediction of inplane damping from deterministic and stochastic models
G. Lehmann and K.-H. Fu	159	Theoretical and experimental investigations on a six-component rotor balance
K. Pfeifer and O. Haider	175	Impact of modern fiber composite materials on dynamically loaded structures
Andrew J. Niven, Roderick A. McD. Galbraith and David G. F. Herring	187	Analysis of reattachment during ramp down tests
O. A. Bauchau and S. P. Liu	197	Finite element based modal analysis of helicopter rotor blades
	i	Guidelines for the preparation of typescripts for direct reproduction

Number 3

APPLICATIONS OF SYSTEM IDENTIFICATION IN ROTORCRAFT FLIGHT DYNAMICS

Gareth D. Padfield	V	Foreword
Peter Hamel	207	System identification collaboration—the role of AGARD
Jürgen Kaletka and Wolfgang von Grünhagen	213	Identification of mathematical derivative models for the design of a model following control system
S. S. Houston	229	Identification of a coupled body/coning/inflow model of Puma vertical response in the hover
R. A. Feik and R. H. Perrin	251	Identification of an adequate model for collective response dynamics of a Sea King helicopter in hover
Ronald Du Val, Ofer Bruhis and John Green	267	Identification of a coupled flapping/inflow model for the Puma helicopter from flight test data
R. Bradley, C. G. Black and D. J. Murray-Smith	281	System identification strategies for helicopter rotor models incorporating induced flow
Ji C. Wang and Peter D. Talbot	295	Identification of rotor flapping equation of motion from flight measurements with the RSRA compound helicopter
R. W. Du Val, O. Bruhis, J. M. Harrison and J. W. Harding	311	Flight simulation model validation procedure, a systematic approach
Mark B. Tischler	327	Advancements in frequency-domain methods for rotorcraft system identification
C. G. Black and D. J. Murray-Smith	343	A frequency-domain system identification approach to helicopter flight mechanics model validation
J. H. de Leeuw and K. Hui	369	The application of linear maximum likelihood estimation of aerodynamic derivatives for the Bell-205 and Bell-206
D. A. Teare, P. M. FitzSimons, B. H. Tongue and D. P. Schrage	393	Time domain parameter identification techniques applied to the UH-60A Black Hawk Helicopter
D. Leith and D. J. Murray-Smith	403	Experience with multi-step test inputs for helicopter parameter identification
	i	Guidelines for the preparation of typescripts for direct reproduction

Number 4

J. Ryan and T. H. Lê	413	A quadrature-collocation technique for boundary element method: application to helicopter fuselage
I. C. Cheeseman and C. Haddow	421	An experimental investigation of the downwash beneath a lifting rotor and low advance ratios
R. Markiewicz	447	Theoretical and experimental analysis of a model rotor blade incorporating a swept tip
C. T. Tran and A. Desopper	463	An interation technique coupling 3-D transonic small perturbation aerodynamic theory and rotor dynamics in forward flight

S. Hanagud, M. Meyyappa, S. Sarkar and J. I. Craig 473 Elastic fuselage modes and higher harmonic control in coupled rotor/airframe vibration analysis

Daniel P. Schrage and Stephen A. Meyer 485 Rotorcraft preliminary design education

i Guidelines for the preparation of typescripts for direct reproduction
